of copper castings, wire and everything in that line.

Some of the material for the building of the high-line tramway is on the ground, and work will soon be started on the foundations for the long swing standards, both on the Pine cauyon side of the range and Bingham. This work will occupy considerable time and expense on account of the difficulty of getting material to the ground on the range. As fast as necessary the reverberatory furnaces will be finished. The foundations for the five big crushers are being completed, and one of them is already on the ground. They each occupy a box car, thus some idea can be gained of the enormity of these machines.

The furnace cranes, one 30 and the other 60, have been received, and will be put in place at the time the furnaces are put up.

Manager Lon Hyde was recently in the district and let a contract for 100 feet of unnel work at the Biscuit mining com-

tunnel work at the Biscuit mining company property.

Only one leaser is now at work at the North Mountain property. In the old workings of this property, which was worked over twenty years ago, there is considerable ore. An engineer who recently explored the old workings declares that there is now blocked out in the neighborhood of \$5,000 tons of \$14 ore.

Mr. Walker has recently purchased the the ground. They each occupy a gox car, thus some idea can be gained of the enormity of those machines.
